

ALL ABOUT AUTOIMMUNE

Although seemingly unrelated, all autoimmune diseases share a common thread: they involve an immune system that mistakenly attacks the body's own healthy tissue. They are often misdiagnosed but can have severe health consequences, which is why a holistic approach is necessary for a complete understanding.

WHO TO REACH OUT TO FOR INSIGHT

Patient | Carer | Parent | Infusion Nurse | Pharmacist
 Payer/Office Manager | MD Specialist | Rheumatologist
 Neurologist | Physical Therapist | Psychiatrist

← ORGANS OF THE IMMUNE SYSTEM

HOW TO COPE

Since there is no cure and immunosuppressant drugs can be dangerous, sufferers often seek alternative treatments, such as:

MORE COMMON THAN YOU THINK

80+ known autoimmune diseases

45%

of patients with real autoimmune diseases are labelled chronic complainers in the earliest stages of their illness

AUTOIMMUNE SUFFERERS BY THE NUMBERS

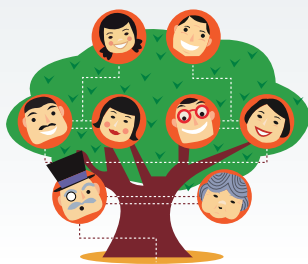

100,000

individuals in the UK are affected by rare autoimmune diseases

1 out of 5 people has an autoimmune related condition

MORE LIKELY TO STRIKE

Those related to someone with an autoimmune condition are more likely to also have one – even if it is a different disease.

75%
 of cases are women
